

Attachments for Toyota Forklift

Toyota Forklift Attachment - Since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, has been the best selling lift truck dealer in the United States. Proudly celebrating more than 40 years of performance, the Irvine, California established company provides a complete line of quality lift trucks. Resulting from their status of excellence, reliability, and sturdiness, Toyota remains popular in this aggressive market. Quality is the foundation of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S. are manufactured here.

All Toyota machinery and parts designed within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to constant development, and its environmental methods. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70% less smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, links Toyota's accomplishment to its robust commitment to constructing the best quality lift trucks while delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHUs parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's principal lift truck provider and is amongst the magazines prominent World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not a lot of other corporations and no other lift truck maker can match Toyota's record of caring for the environment while concurrently encouraging the economy. Environmental accountability is a key aspect of corporate decision making at Toyota and they are proud to be the first and only maker to provide UL listed, EPA and CARB certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission values, and also meets California's more intricate 2010 emission standards. The end creation is a lift vehicle that creates 70 percent fewer smog forming emissions than the current Federal standards tolerate.

What's more in 2006, Toyota established a partnership with the Arbor Day Foundation, furthering their dedication to the environment. Upwards of 57,000 trees have been planted in community parks and national forests damaged by environmental reasons such as fires, as a result of this partnership. 10,500 seedlings have also been scattered through Toyota Industrial Equipment's network of sellers to non-profit organizations and local consumers to help sustain communities all over the U.S.

Industry Leader in Safety

Toyota's lift trucks offer better stability, visibility, productivity, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS", helps limit the chance of incidents and accidental injuries, and increasing productivity levels while minimizing the potential for merchandise and equipment damage.

System Active Stability senses many aspects that might lead to lateral insecurity and possible lateral overturn. When one of those conditions are detected, SAS immediately engages the Swing Lock Cylinder to stabilize the rear axle. This changes the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

The SAS systems were initially adopted on the 7-Series internal combustion lift trucks which were put on the market in 1999. These systems helped drive Toyota into the lead for industry safety standards. Now, SAS is utilized on virtually every modern internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker training, overturn fatalities across all brands have decreased by 13.6% since 1999. Also, there have been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's uncompromising values extend far beyond the machinery itself. The company believes in providing widespread Operator Safety Training courses to help clients satisfy and exceed OSHA standard 1910.178. Education packages, videos and various materials, covering a wide scope of topics from personal safety, to OSHA rules, to surface and load situations, are offered through the dealer network.

Toyota's U.S. Commitment

Since the sale of its first lift vehicle in the U.S. to the construction of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has maintained a unbroken presence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service components, with the total commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and clients of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and finally a training center.
